Ogbu Ugochukwu Princewill

AI Automation Consultant · Robotics Engineer · AI & Data Trainer

Lagos, Nigeria · +234 903 940 4716 · ogbu106@gmail.com · princewill106.github.io · github.com/Princewill106 · linkedin.com/in/ugochukwu-ogbu-653a0816a

PROFILE

AI automation consultant and robotics engineer who has trained 500+ students, career switchers, teachers and school leaders across Africa to build with AI. I design and ship automations in n8n, Make, Zapier and Python, build robotics and IoT systems on ESP32, Arduino, Raspberry Pi and ROS, and turn both into project-based programmes where learners finish with working systems. Author of a 50-project open-source AI automation library; represented Nigeria at Codeavour 6.0 in Qatar.

CORE SKILLS

AI automation	n8n, Make, Zapier, Airtable, REST APIs and webhooks, WhatsApp Cloud API, Google Workspace, AI agents, RAG
AI and data	Python, SQL, Pandas, scikit-learn, TensorFlow, OpenAI and Anthropic APIs, Power BI, Tableau, Excel
Robotics and IoT	Arduino, ESP32, Raspberry Pi, Jetson Nano, micro:bit, ROS, C/C++, sensors and motor control, PID tuning, OpenCV, TinkerCAD, Wokwi
Software	JavaScript, Node.js, Django, Flask, React, MySQL, MongoDB
Teaching	Curriculum design, project-based learning, instructor coordination, workshops for school leaders and teachers, competition coaching

EXPERIENCE

AI Automation Consultant · Bitmine Robotics & Codeworld Concepts
Current · Consulting

- Advise both companies on AI automation and set up automated workflows for their teams.

AI Automation Lead · Utiva
May 2026 – Present · Remote

- Lead 12-week AI automation cohorts for professionals and graduates, teaching n8n, Make, Zapier, Airtable, APIs and AI tools.
- Learners ship working systems, including a Resume Analysis Agent that returns actionable CV gaps and an HMO Performance System that turns claims data into decisions.
- Mentor learners from idea to testing, deployment and demo day; graduates leave with portfolio-ready builds.

AI and Automation Specialist · Loubby AI
2026 – Present

- Build and deploy automated workflows that remove manual processes, integrating databases, web apps and APIs.
- Develop AI-powered solutions including chatbots, recommendation logic and predictive models.
- Design training programmes and materials on AI and automation, and deliver workshops to teams.

Head Curriculum Developer · Nigenius, Lagos
Aug 2025 – Present

- Lead curriculum design across robotics, AI, coding and STEM for primary, secondary and advanced learners.
- Coordinate instructors and content teams to keep programmes consistent, current and measurable.

Coding and Robotics Engineer · Nigenius, Lagos
Feb 2022 – Present

- Run robotics and coding programmes in schools across Lagos using LEGO, Arduino, Tetrix, micro:bit, Python and C++.
- Train teachers to integrate robotics into STEM lessons; mentored students who went on to win robotics and coding competitions.

STEM Program Manager · Tech Talent Academy
Mar 2025 – Present

- Design, deliver and evaluate robotics, coding, AI and data science programmes reaching 500+ students a year across partner schools.
- Run competitions and initiatives including Battle of the Bots and STEM for the Girl Child.

Chief Robotics Engineer · Tech Talent Academy
Aug 2024 – Present · Ijebu Ode, Ogun State

- Supervise delivery of robotics training and student projects.

Robotics Software Engineer · Tingo Media
Dec 2024 – Present · Victoria Island, Lagos

- Design and program robots on Arduino, ESP32, Raspberry Pi and micro:bit, including smart irrigation, obstacle-avoiding, voice-controlled and surveillance robots.
- Integrate machine learning for voice recognition and object detection; improved control accuracy with tuned PID and sensor-fusion logic.
- Produced 3D/CAD design work for a military rover prototype.

AI and Machine Learning Tutor · Africa Agility Foundation
Jan 2025 – Present

- Teach AI fundamentals, ML algorithms, neural networks and data preprocessing through projects such as image recognition, chatbots and predictive models.

Backend Instructor · Africa Agility Foundation
Jun 2023 – Present · Remote

- Train women across Africa in backend development with Node.js, Django, MySQL and MongoDB.

Data Analytics Instructor · Beylearning
Jul 2024 – Present · Remote

- Teach Excel, SQL, Power BI and Python; built a student progress tracking dashboard for real-time feedback.

Senior Full-Stack Software / Data Engineer · TechQuest STEM Academy
Jan 2024 – Oct 2025

- Built data models, analysis pipelines and software applications; mentored aspiring software and data engineers.

Senior Data Analyst / Instructor · TechQuest STEM Academy
Nov 2023 – Sep 2024

- Created data analytics curricula and supervised capstones in sales, logistics and environmental analytics.

Earlier experience

- **IT Manager**, Bitmine Hub (part-time) · Oct 2021 – Present
- **Full Stack Developer**, Zuri Team (freelance) · May 2022 – Jun 2023
- **Machine Learning Intern**, OneCampus Academy · Apr 2022 – Jun 2023
- **Technology Advisory Intern**, KPMG / First Bank of Nigeria · Jun – Dec 2018 · CRM and data migration, data cleansing and validation

SELECTED PROJECTS

AI Automation Projects series · 50 open-source builds with working Python code, tests and importable n8n workflows (github.com/Princewill106)

- **WhatsApp Support Agent:** classifies customer messages, answers from the business's own FAQ, looks up order status and hands complaints to a human.
- **Invoice Processing Automation:** extracts invoice fields, checks arithmetic and VAT, catches duplicates and unknown suppliers, and queues exceptions for review.
- **KYC Verification Pipeline:** document classification and cross-checks that return verified, rejected with a fixable reason, or referred, with an audit trail.
- **School Admissions Automation:** completeness checks, weighted scoring against seat limits, and automatic parent messages at every stage.
- **Delivery Route Optimizer:** capacity-aware vehicle split with nearest-neighbour and 2-opt; cut a 12-stop Lagos sample plan from 316 km to 134 km.

Robotics and IoT · Smart irrigation controller (ESP32, median of three soil sensors, rain-forecast skip, manual override) · Cold chain monitor (local-first temperature logging, escalating alarms, compliance report) · Vision pick-and-place (part detection, camera-to-arm calibration).

AWARDS AND COMPETITIONS

- Represented Nigeria at **Codeavour 6.0**, Qatar
- **Best AI Project**, Battle of the Bots 2024
- **1st Place**, STEMite Zone Competition
- **Entrepreneur of the Year**, Student Union Government, FUTO, 2019

EDUCATION

Geoscience (Geophysics option), Federal University of Technology Owerri · 2019 · Second Class Upper

CERTIFICATIONS

- Python Programming Essentials, Rice University
- Data Representation with Python, Rice University
- Web Development with HTML, CSS and JavaScript Essentials, Coursera, 2023
- African Girls in Tech Cohort 6.0, Africa Agility Foundation, 2023
